

i don't understand what the fuss is all about. don't we have freedom to choose where we, as citizens, get our information? are there not alot of irresponsible news sources out there cause more trouble in this country than a satellite radio company broadcasting weather and traffic? they use there own signal, broadcasters, etc. they are not "borrowing" some other companies info. i really don't understand why i can't have the freedom to push a button and get instant traffic info on my way to work. what's the difference between them, and a local broadcast, where i have to wait 10-15 minutes for trafic info? hell, i'm almost to work by then. barring no traffic jams!!
